

To whom it may concern,

We the people are concerned about this hearing you have requested for yet another rate hike in the utility bills of the people. We would like to say that within a period of about six months, you have already raised our bills three times. With this economy in the state that it is in, we don't know how you are allowed to do this to us. Normally when people have a budget, if they cannot afford to buy something they wait until they can afford it. People are either out of work or are forced to take a minimum wage job and part time hours and are barely scraping by just to pay for living expenses (just necessities) but make too much to qualify for any help (even though we pay taxes for that help). Companies like you are going to put us all out on the street. Homeless. It is pretty sad when utilities for even a small dwelling on your budget plan is more than half of rent payment. That's too high and we want it to stop. Not everyone has money to buy all energy efficient appliances etc., so you get them all to convert and still raise it? We are no better off than when we started. Renters cannot always get their landlords to comply either, so we are stuck paying more to live. That's not saving us money. It's just putting more in your pocket.

Sincerely,
We The People
